

Montana Department of Natural Resources and Conservation

Renewable Resource Grant and Loan Program

To submit an application for the funding options:

<https://dnrc.mt.gov/Conservation/Grant-and-Loan-Programs/Renewable-Resource-Grants-and-Loans/>

1. Select the Private Grant “Learn More” button in the second row. Here, there are a few things to check out regarding the program.
2. Select “Apply Now”
3. On next page choose “RRGL Private Grants”. This will take you to another page where you need to create an account before you are able to apply.
4. Then answer the questions given in the application.
 - a. Applicants need an estimate of the costs to connect into the new sewer main.
 - b. There is an Authorizing Statement form that is required to complete which needs to be printed, signed and uploaded into the application.
 - This form verifies you are who you are so that you can legally enter into a contract with DNRC for the funding.
 - If you have trouble with this step, we can help print the form and it can be mailed back to RRGL. David will upload it for you.

Please contact David Larson if you have any questions or need additional assistance. (He will be out of the office until April 5th but someone will see over the program while he is out).

David Larson, P.E.
